What are the risks and what could I get in return?

- The Summary Risk Indicator, seen hereunder, is a guide to the level of risk of this this plan carries when compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are unable to pay. The Underlying Funds are made up of investments which have different levels of risk, each ranging from one (1) as the lowest to seven (7) as the highest.
- The Share Class is in risk category 3, due to the rises and falls of its price or simulated data in the past. How long should I hold it and can I take money out early?

Recommended holding period: 20 years

The product is designed as a long term investment, so the minimum holding period recommended is 20 years. In view of the entry and ongoing costs we encourage you to keep this plan up to maturity. Once the policy starts you have 30 days to cancel your policy whereby the premium paid will be refunded; this is commonly known as the “cooling off” period. In case the policy is not paid at scheduled due dates, the protection in case of death stops. In the event that you need to access your policy account value earlier than the maturity date, surrender charges will apply as a percentage of the Cash Surrender Value (for partial surrenders) or of the Policy Account Value (for full surrenders), depending on the policy year, for partial or full withdrawals, as it follows: 30% in year 1, 25% in year 2, 20% in year 3, 15% in year 4, 10% in year 5 and 5% in years 6, 7, 8 and 9. Further details can be found in the Terms and Conditions of the contract.
