### What is this investment option?

**Investment Objectives:** The Fund aims to achieve a high level of income together with long term capital growth. The Fund invests primarily in high yield debt instruments of issuers worldwide, including issuers in emerging market countries. The Fund intends to invest primarily in debt instruments (including but not limited to debt issued by governments and companies, and convertible bonds). The Fund invests worldwide in both developed and emerging markets. The Fund may invest in non-investment grade debt instruments, including debt instruments which are in financial distress. Any income from your investment will be reinvested. Detailed information regarding the policy account is provided in the yearly statement, which is sent to you on your policy anniversary.

**Intended Retail Investor:** The fund is intended for a retail customer with low risk appetite, who plans to invest more than 5 years, without withdrawals. Before purchasing this plan your intermediary will ask you a set of questions to verify that this plan meets your objectives and falls in line with your risk and reward appetite.

### What are the risks and what could I get in return?

- The Summary Risk Indicator, seen hereunder, is a guide to the level of risk of this plan carries when compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are unable to pay.
- We have classified this fund in risk category 3 (out of 7), which is considered a medium-low risk class. This rates the potential losses from future performance at a medium-low level.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

- The stress scenario shows what you might get back in extreme market circumstances.
- The favorable, moderate and unfavorable scenarios are the result of bootstrapping simulation, corresponding to the 10th, 50th and 90th percentile of the statistical distribution.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 1,000 per year is invested.

	If you exit after 1 year	If you exit after 10 years	If you exit after 20 years
<b>Total costs</b>	<b>€ 12</b>	<b>€ 673</b>	<b>€ 2,347</b>
<b>Annual cost impact (*)</b>	<b>1.2 %</b>	<b>1.3 % each year</b>	<b>1.2 % each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.5% before costs and -1.7% after costs.
